2	UT-VLD	Bear	Full Suppression	3 mi NW of Helper, UT	10,526	+324	14%	6/30/21	Type 2 IMT CAL Team 10 Daren Dalrymple	3	5	5	2	1	394	1 T6 engines, 1 Helco, 1 Demob Unit 1 SCKN 1 EQTR 1 Comps Claim	Sage Grouse Habitat, Private residences along Spring Creek and Helper, UT. Powerlines, Railroad, Watershed, Oil & Gas allotments.
3	UT-MLF	Bennion Creek	Full Suppression	16 mi ENE of Indianola, UT	7,724	+124	10%	7/10/21	Type 3 IC Matt Way Cal Team 10 take command 6/15 0600	3	5	2	2	1	254	Aviation support Crew replacement	Potential Sage Grouse habitat, evacuations, dispersed camping, residences 1 mile away. Road/Trail/Area closures
Ongoing Long Duration Fires – Not Being Prioritized for Resource Commitment																	
Notes of Significance ***																	
Fires highlighted in yellow have submitted a FINAL ICS-209 or will no longer meet criteria to be prioritized																	
	NV-SND	Sandy Valley	Full Suppression	10 mi SW of Las Vegas, NV	1,380	+0	92%	6/17/21	Type 4 IC								Turned back to the local unit.

## Evening Brief

Date: June 14<sup>th</sup>, 2021

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 2	New Fires and Acres: 17 fires for 914.2 acres / 4,527 acres Large Fire Growth

---

### Weather Summary:

... **Warmer and Drier through the Weekend and HOT/DRY Next Week ...**

... **Lightning Returning by Mid-Week ...**

High pressure strengthens over the Great Basin through the rest of the week, producing **record heat again with temperatures 10-20 degrees above normal for Utah, Southern Nevada and the Arizona Strip through Wednesday, then across all of Nevada, Utah into southern Idaho later this week.** High Risk has been issued for Record Temperatures/Very Low RH for these areas. In addition, on Tuesday there will be a zone of critical winds of 30-40 mph across parts of eastern Nevada into Western Utah, along with single digit humidity, and critically dry fuels, especially further east into Utah.

Moisture at the upper levels of the atmosphere begins to get picked up off the southern edge of the Four-Corners High by midweek, and gets pushed with increasing chances of isolated dry lightning moving into southern Utah and the Arizona Strip by Thursday, then spreading north and west into eastern Nevada by Friday. These storms will produce lightning but very little rain at the surface and could also produce gusty outflow winds. Storms will linger across Utah through Sunday with drying from the west. **High Risk has been issued for Lightning on Thursday through the weekend.**

---

### Fuels/Fire Potential:

... **Fuels and Fire Behavior Advisory in effect: Utah, the Arizona Strip and Southern/Eastern Nevada ...**

Fuels are drying rapidly across all areas. Across most of Utah, the Arizona Strip, and Southern NV, fuels are already at mid-summer peak levels, to near record level dryness in the far south. Further north, into Northern Nevada, Idaho and Western Wyoming, fuels are drying rapidly and already critical in many lower elevations. Live Fuel moisture in low elevation brush, south of the Idaho border remains critically dry, 60-100% in most areas, which correlates with extreme fire behavior. Heavier 1000-hr fuels in southern forests are at record dryness levels already.

Large fire potential remains high across the southern half of the Great Basin, for extreme heat and dryness the next 2 days, combined with wind in some areas. By Thursday the focus shifts to increasing dry lightning potential, in many of our driest areas of the Arizona Strip, Utah and Eastern Nevada, and with this threat of isolated but long duration lighting possible thru the weekend. New ignitions are likely, with the potential of rapid growth in heavier fuel pockets.

## Resources:

### Aviation within the Great Basin

- 0 VLAT, 3 LATs, 0 CL-415
- 15 SEATs, 0 FB, 7 AA, 0 ASM, 2 LP
- 10 Type 1 Helicopters / 7 Comm.
- 9 Type 2 Helicopters / 5 Comm.
- 12 Type 3 Helicopters / 4 Comm.

### Crews Committed within the Great Basin

- 15 IHCs / 2 Available
- 20 Type 2IA / 4 Available

## Current Incident Details

Today's Activity (from WFDSS):
